Description

ONE-STEP is a Disinfectant, Cleaner, Mildewstat, Fungicide and **Virucide** specifically formulated for use in hospitals, nursing homes, healthcare clinics, schools, food processing plants, food service establishments, office buildings, lodging properties (hotels, motels, resorts and retreats), veterinary hospitals, as well as fitness clubs, athletic and recreational facilities where housekeeping is of prime importance in controlling the hazard of cross contamination. **ONE STEP** is perfectly suited to be used to clean larger public areas like lobbies, operating rooms, classrooms. It is an **E.P.A. registered cleaner disinfectant** that is effective against a broad spectrum of germs that cause disease*, including *Pseudomonas ammoniagenes* PRD 10, *Escherichia coli*, *Klebsiella pneumoniae*, *Salmonella schotuellerei*, *Salmonella enterica*, *Streptococcus salivarius*, *Brevibacterium ammoniagenes*, *Streptococcus faecalis*, *Shigella dysenteriae*, *Enterobacter aerogenes*, *Staphylococcus aureus*, Methicillin resistant *Staphylococcus aureus* (MRSA), Vancomycin intermediate resistant *Staphylococcus aureus* (VISA), *Streptococcus pyogenes* (Clinical Flesh-Eating Strain BIRD M3), *Klebsiella pneumoniae* New Delhi Metallo-Beta Lactamase (NDM-1), Carbapenem Resistant and meets all requirements for hospital use. **ONE STEP**'s effective viricidal activity has been demonstrated against Influenza A2/Japan (representative of the common flu virus), Herpes Simplex Type 1 (causative agent of fever blisters), Adenovirus Type 2 (causative agent of respiratory infections), Vaccinia virus (representative of the Pox virus group), Human Immunodeficiency Virus Type 1 (HIV-1), Hepatitis B Virus (HBV), Hepatitis C virus (HCV), Norovirus (Norwalk Virus) and Pandemic 2009 H1N1 Influenza A virus (formerly called swine flu). This neutral pH, no-rinse cleaner removes dirt without attacking the surface material to leave a light and fresh lemon fragrance behind. Non-dulling to floors. Meets OSHA Bloodborne Pathogen standards for HIV, HBV and HCV.

Directions

Use **ONE-STEP** diluted according to all directions and precautions on label and in Safety Data Sheet (SDS) before using. **Dilution: 1:64.** Simply add **two ounces (59.15 mL)** of **ONE-STEP DETERGENT / DISINFECTANT per one gallon of water (3.785 L)**. **ONE STEP** is Effective in hard water (up to 400 ppm hardness in presence of 5% serum contamination). Can be used to make wipes by pouring **diluted liquid** into **ScottPure Critical Task Wipers** container.

**Note: SARS-CoV-2 is a new virus. Such pathogens are often unavailable commercially for laboratory testing. While no product currently exists that has been tested against SARS-CoV-2, the cause of COVID-19, according to EPA published guidelines, the above mentioned product is expected to be effective based on its "demonstrated efficacy against a harder-to-kill virus".*
